

Hi-def wireless projection

The Acer P5260i lets you enjoy cable-free projection in various presenting environments, for better meetings and more convenient multimedia viewing. Using the latest 802.11b/g wireless technology, the Acer P5260i ensures lossless quality and instantaneous projection of high-def video and images from anywhere in the room.

A high brightness rating of 2700 ANSI Lumens, native XGA (1024 x 768) resolution, and 2000:1 contrast ratio bring out vibrant colors for a totally absorbing viewing experience in all lighting conditions.

Hi-def wireless projection

Acer Projector P5260i Quick Spec

Projection system	DLP®
Resolution	Native: XGA (1024 x 768) Maximum UXGA (1600 x 1200) WSXGA+ (1680 x 1050)
Aspect ratio	4:3 (native), 16:9
Brightness	2700 ANSI Lumens (standard) 2160 ANSI Lumens (economy)
Contrast ratio	2000:1
Displayable colors	16.7 million colors
Projection lens	F / 2.41 to 2.55, f = 21.79 mm to 23.99 mm; Manual zoom (1.1x) and manual focus
Projection screen size	23 - 300 inches (58 cm - 762 cm)
Projection distance	3.3 - 39 feet (1.0 m - 11.9 m)
Throw ratio	50 inches @ 2 m
Lamp type	Osram 200 W user replaceable P-VIP lamp
Lamp life	3000 hours (standard), 4000 hours (economy)
Keystone correction	+/-40 degrees (vertical)
Projection mode	Front, rear, front-ceiling, rear-ceiling
Ceiling mount capability	Yes
Audio	One internal speaker with 2 W output
Weight	3.0 kg (6.6 lbs.)
Dimensions (W x H x D)	299 x 229 x 93 mm; 11.8 x 9.0 x 3.7 inches
Remote control	IR remote control with laser pointer, mouse and PgUp/PgDn functions
Noise level	31 dBA (standard), 25 dBA (economy)
Network interface	802.11b/g wireless technology Ethernet port (RJ-45) x 1 Wireless antenna connector (SMA) x 1

Feature Highlights

Bright, realistic display

- Unique, elegant design
- Acer ColorBoost Technology
- XGA resolution
- 2700 lumens and 2000:1 contrast ratio
- DLP system design

Convenient usability

- Acer eView Management with innovative Blackboard Mode
- Acer eTimer Management
- Acer eOpening Management
- Acer SmartFormat technology
- Acer Top-Loading Lamp design
- Acer InstantPack technology
- Automatic safety shutdown
- Quick signal detection

Multimedia excellence

- World-leading HD wireless projection
- Digital connectivity via an HDMI™ port
- Digital connectivity via a DVI-D port
- Dual D-Sub input
- Multi-PC connectivity
- Monitor loop through
- RS-232 port
- Microsoft Vista® compliant

Comprehensive functionality

- Longer lamp life (4000 hours)
- Low noise level
- Keystone correction (40° vertical)
- Digital zoom and pan
- Built-in speaker
- Alarm
- PIN security
- Sliding lens cover
- ECO mode

ColorBoost

Acer ColorBoost Technology

Featuring an optimized 6-segment color-wheel design, powerful image processing, and advanced lamp illumination technology Acer ColorBoost technology provides incredible color performance, never before seen in conventional projectors. Brilliant color with a high contrast ratio presents ultra-vivid images for business presentations, educational purposes, and home entertainment.

SmartFormat

Acer SmartFormat Technology

Conveniently supports comprehensive wide-format PC signals. Users no longer need to worry about annoying "Signal not supported" issues, nor must they change the resolution of their wide-format notebook.

World-leading HD Wireless Projection

Acer projectors are the first to offer HD wireless projection, ensuring lossless quality and instant transmission of high-def video and audio via the latest 802.11b/g wireless technology. Up to 1080i/720p resolution allows you to view ultra-sharp, seamless fast-moving videos even on large screens, and an onscreen console enables one-click connection with conference control for multiple presenters.

Plug & Show Token

The Plug & Show token provides installation-free wireless projection. Guests using the token for the first time can instantly launch the projection utility and begin presenting without pre-installing any software or drivers on their notebook. Users can create more Plug & Show tokens via a USB flash disk, allowing easy access and compatibility for multiple guests.

Acer Quad-View Technology

Acer Quad-View technology divides the projection screen into four, allowing content from different PCs to be displayed simultaneously. Multiple users can easily connect to the wireless projector using their own tokens.

Acer Top-Loading Lamp Design

The lamp module is now top-loaded, as opposed to the conventional bottom-loading design. Hence, even when the projector is ceiling-mounted, the user can easily replace the lamp module without detaching the projector from the ceiling.

Instant Pack

If the user is in a hurry to leave, the power cord can be unplugged right after the projector is turned off, without any resulting damage. There's no need to wait for a cooling period; the user can pack up the projector and leave immediately.
