

BenQ.com
Specifications

Projection System	DLP®Technology by Texas Instruments*	
Panel	XGA DDR DMD™ x 1	
Native Resolution	XGA (1024 x 768)	
Brightness	3000 ANSI lumens	
Contrast Ratio	2000:1 (Full on/Full off)	
Aspect Ratio	4:3 Native, 16:9 Selectable	
Color	Full 16.7 million color palette	
Lens	F=2.42, f=7.5 mm	
Zoom Ratio	Fixed	
Image Size (Diagonal)	67" to 300"	
Throw Ratio	74" @3.3feet (74" @1m)	
Lamp	280W, 3000/4000 hours (Normal/Economic mode)	
Computer Compatibility	VGA(640 x 350) to SXGA(1280 x 1024)	
HDTV Compatibility	480i, 480p, 576i, 576p, 720p, 1080i	
Video Compatibility	NTSC, PAL, SECAM	
Horizontal Frequency	31-82 kHz	
Vertical Scan Rate	48-85 Hz	
Input Terminals	PC	Analog RGB: D-sub 15 pin x 1 DVI-I(HDCP support)
	A/V	Component Video: D-sub 15 pin (Shared with Analog RGB connector) S-Video: Mini Din 4 pin x 1 Composite Video: RCA x 1
	Audio	Stereo Mini Jack x 1
Output Terminal	PC	12V Trigger D-sub (15 pin) X 1
	Audio	2 Watt Speaker x 1
Control Terminal	Serial Connector : RS232 8 pin MINI DIN	
	USB Connector : USB x 1, Type mini B	

* The actual lamp life may depend on the surrounding environment. Condition may affect lamp life including altitude, temperature or switching the projector on and off.

	Distance (M)	0.5	1	1.5	2	2.5	3	4	5
	4:3 aspect ratio, screen size (inch)	37	74	111	148	185	222	296	370
	16:9 aspect ratio, screen size (inch)	34	68	102	135	170	204	272	340

* There is 3% tolerance among these numbers due to optical component variations.

Short Distance, Amazing Large View

Enjoy Large-format Video From A Close-range Projector.

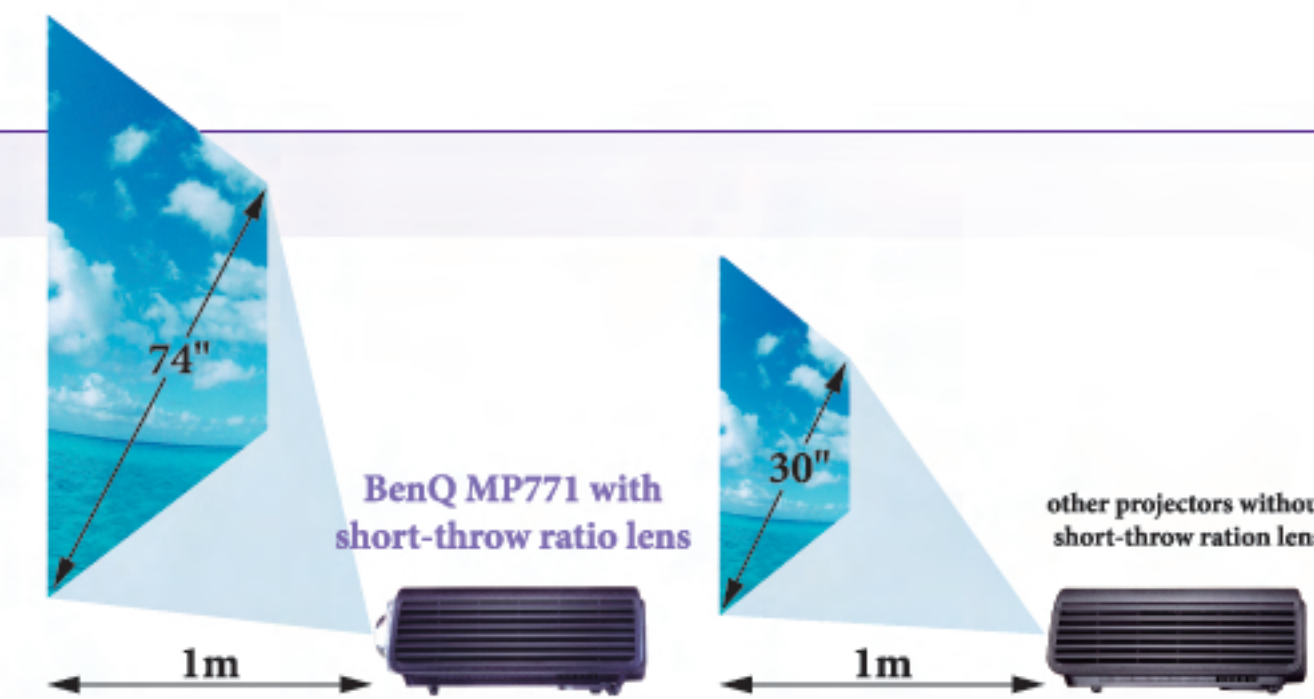

Unbelievably Big Images From An Unbelievably Short Distance

Wish you could enjoy a big-screen show, but don't think the space you have in mind is large enough? Then the BenQ MP771 is your small-space solution. That's because this premium, high-brightness XGA projector has an amazing short-throw ratio, enabling large-screen projection from a close range. It's perfect for places where space is limited, like partition rooms, small conference rooms, lecture halls or classrooms where physical layout forces the projector to be up close to the screen.

Short-Throw Perfected

With its smart short-throw ratio, the MP771 makes big screen viewing easy for smaller areas, such as departmental meeting rooms or living rooms-where it can deliver a phenomenal experience with the interactive games currently in vogue. Able to project a 74" picture from just a mere meter away, the MP771 not only overcomes space constraints, but positioning it close to the screen keeps the movements of viewers from affecting the picture. The short-throw ratio also makes it more practical & safe for presenters to stand between the projector and audience, avoiding the annoyance and health risks of the bright projector lamp shining into their eyes. The MP771's short-throw ratio means limited space no longer limits your big-screen viewing pleasure.

A Vibrant View Every Time

With the MP771's advanced optical technologies, you can count on high-impact, richly-colored presentations any time, regardless of ambient lighting conditions or onscreen content. The MP771 automatically enhances brightness levels while maintaining an impressive high contrast ratio.

Brightness that Outshines

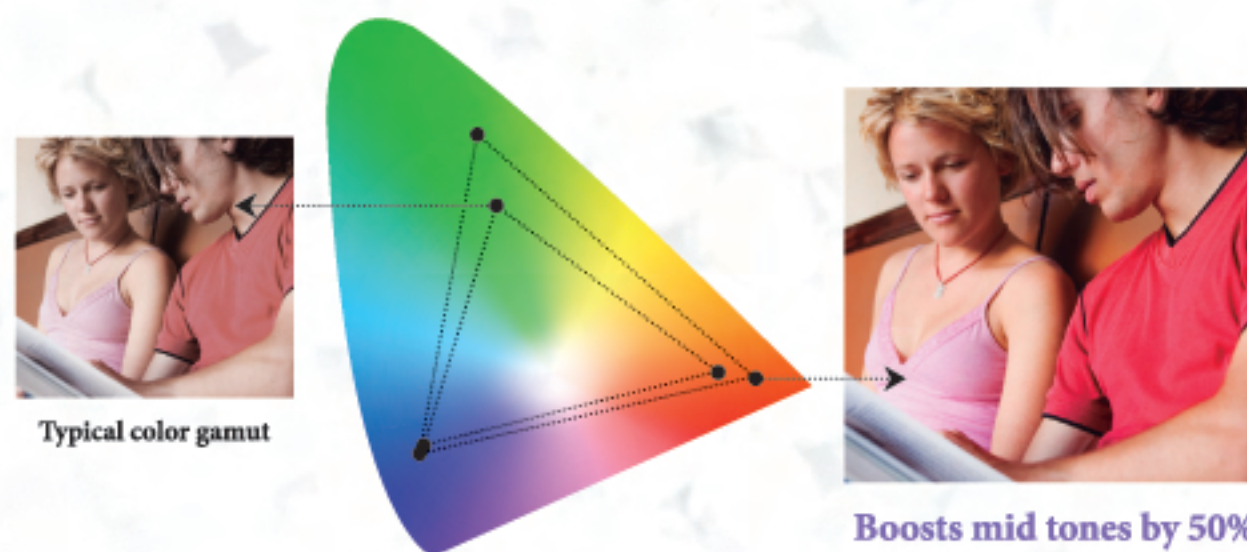

3,000 ANSI Lumens BenQ understands that not every presentation will have the benefit of a pitch-dark room. That's why the MP771 features a powerful 3000 ANSI lumens for super bright, vivid pictures under virtually any lighting condition. So don't leave your audience scribbling notes in the dark - the MP771 displays even the smallest text and detailed graphics in sharp, crisp quality even under considerable ambient light levels.

In Living Color

The MP771 brings together a powerful trio of technologies for color performance that's always optimal, easily and precisely adjustable to meet individual preferences.

BrilliantColor™

BrilliantColor™ Technology, among the latest advancements in front-projection projectors, enables a greater than 50% brightness increase in mid-tone hues, resulting in highly saturated, extraordinary images. Coupled with BenQ's 6-Segment Color Wheel, presentations are rendered in breathtaking vibrancy.

High Contrast, High Quality - See What You've Been Missing

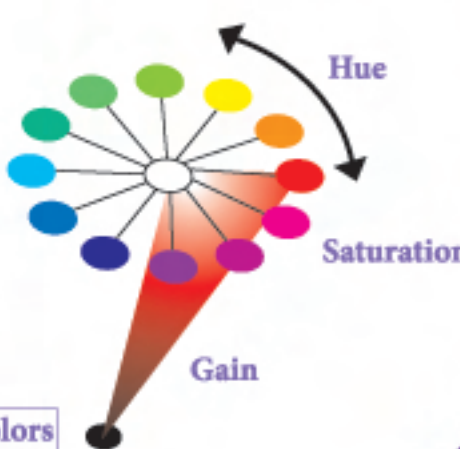

Contrast 2000:1 The MP771's impressive 2,000:1 contrast ratio brings out details you've been missing from other projectors. Even in darkly lit scenes, the once unnoticeable, small details amazingly emerge in surprising clarity.

The Latest UNISHAPE Technology

Featuring new UNISHAPE Lamp Lighting Technology, the MP771 is able to vary the intensity of the projector lamp in synchronization with its digital mirror device (DMD) and color wheel, allowing an increase of 40% in brightness and boosts specific colors in different application modes.

Personalized Color with 3D Color Management

3D color management allows users to fine-tune the six colors (R/G/B/C/M/Y) independently for hue, saturation and gain to suit personal preferences or meet the requirements of specific applications.

Super Easy, Super Enjoyable, Super Fast!

With the BenQ MP771 getting your presenting up and running is as easy as "Lights, Projector, Action!" Plus, an array of convenient features keeps your presentation running smoothly without a hitch. Easily accomplish all the tasks you expect with your BenQ MP771, and discover some cool surprises along the way.

Wall Color Correction

No screen available? No problem! With Wall Color Correction, the MP771 still enables you to project outstanding picture quality on the wall. And with five wall colors to choose from, including blackboard, projecting on non-white walls still ensures a great picture without the hassle of manual picture adjustments.

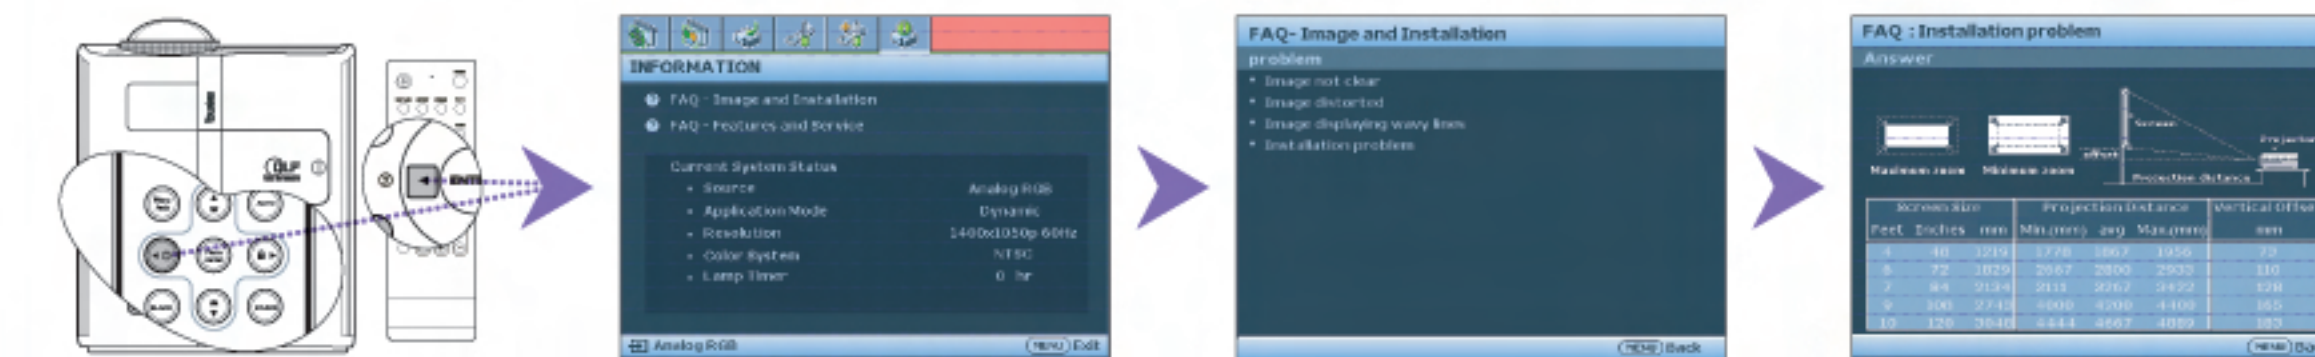

Quick Auto Search

Don't leave your audience hanging; get your picture up in a snap! The MP771 needs just two seconds flat to recognize a source when connected. Even for first-time users, plug-and-play simplicity doesn't get any easier.

On-Screen FAQ

Whether to learn more about a particular feature or for troubleshooting, the MP771's On-Screen FAQ is an easy-to-use, quick reference tool - no more digging out and searching through a printed manual.

Presentation Timer

An on-screen timer helps you keep your presentation at just the right pace. Your audience will also appreciate being able to keep track of how much time remains.

Lamp Care

You can turn the MP771 on and off without concern. The MP771's Lamp Care takes over and makes re-start smooth and trouble free making sure that your bulb is protected from damage.

Top Access Lamp Door

For ultimate ease in changing the projector lamp, the MP771 has a door conveniently located on the projector top. For wall-mounted projectors, this lamp door location is especially practical - eliminating the need to remove the projector from its mount when replacing the lamp.

12V Trigger

The built-in 12v trigger input helps the MP771 easily link with external supporting devices such as the motorized screens, making for less clutter and greater user convenience.

MyScreen

MyScreen With a customizable MyScreen, the BenQ MP771 lets you create your own start up screen -- perfect for promoting corporate identity or as added security that details the owner of the projector.

Your Most Reliable Choice

The MP771 integrates a number of features and design touches for performance and reliability you can count on.

Long-Lasting Lamp

4,000 Lamp Hours With an average use time of 4,000 hours, the MP771 requires fewer lamp changes and less maintenance. That equals more enjoyment, less hassle!

Detachable Keypad

BenQ MP771 combines an enhanced anti-theft security feature, with it's integrated a detachable keypad offering a secure solution to protect your projector from the thief.
